

RenewSys India Pvt. Ltd. is expanding its PV Solar Cell (RESERV™) Manufacturing Facility at Hyderabad, India

RenewSys India Pvt. Ltd has placed an order with reputed European manufacturers for a 100 MW Solar PV Cell line. The new line will be shipped in Q2, 2016 and enhance RenewSys' cell manufacturing capacity to 130 MW. RenewSys intends ordering another 100 MW line from the same vendors by Q3, 2016 and gradually build up its capacity to 500 MW. The lines will be installed at the 50 acre Hyderabad factory, RenewSys recently purchased from the lenders of Solar Semiconductors. The 80 MW Modules (DESERV™) making capacity at the same premises is also being increased to meet the requirement of OEM customers and for exports. Concurrently, RIPL continues to play its leading role in the manufacture of EVA Encapsulant (CONSERV™) and Backsheet (PRESERV™) at its Bengaluru facility. Expansion plans for both products are on the anvil. With its focus on quality, in-house R&D and an integrated offering in the PV value chain, RenewSys is working towards being a sustainable player in the global solar industry. It must be highlighted that the investments being made by RenewSys are based on government policies including capital subsidy and DCR that encourage local manufacture of solar components. The Indian solar industry needs 'handholding' and time to build capacity & become competitive. "The future is, hopefully, bright!"

About Us:

RenewSys India Pvt. Ltd. is a part of the Enpee Group of companies, an international conglomerate with over 55 years of manufacturing experience in diversified businesses.

Right from its inception, RenewSys has consistently proven itself as a global, quality manufacturer of the DESERV™ range of Solar PV Modules (80 MW) and module components i.e. CONSERV™ range of EVA & POE Encapsulant (1.2 GW), PRESERV™ range of Backsheet (1.8 GW) and RESERV™ range of PV Solar Cells (30 MW).

RenewSys has a global presence with offices at India, Mauritius, Nigeria, South Africa, Singapore, UAE, UK and representative offices in USA and several countries across Europe.
